CORE EXPERTISE

AGENTIC AI & LLMS

AI Agents · MCP · LLM Fine-tuning · LangGraph · RAG · Ollama / vLLM

SECURITY

Network Security · Deep Packet Inspection · Threat Intelligence · Phishing Defense

DIGITAL TWINS & IOT

Digital Twins · IoT Simulation

ENGINEERING

Python · C/C++ · TypeScript · Swift · React · Node.js · Docker · Kubernetes

LANGUAGES

English	PROFESSIONAL WORKING
French	LIMITED WORKING
Vietnamese	NATIVE

EDUCATION

MSc, Software Engineering for Ambient Intelligence
Télécom SudParis · 2012 – 2014

Engineer's Degree, Computer Science
Hanoi University of Science and Technology · 2007 – 2012

Luong NGUYEN

AGENTIC AI & SECURITY ENGINEER

Senior software engineer with 15+ years in security and AI, from packet inspection in C to fine-tuned language models and AI agents. Lead developer on EU R&D projects; author of claude-howto (46k+ GitHub stars).

PROFESSIONAL EXPERIENCE

Montimage

2014 – Present

Senior Software Engineer · Paris, France

- **LLM adaptation:** Built a fine-tuning pipeline for security-focused small models (synthetic data, LLM-as-judge, Unsloth/LoRA), run locally via Ollama for phishing detection
- **MCP servers:** Created mitre-mcp (official MCP Registry) and sec-mcp (PyPI), giving AI assistants MITRE ATT&CK knowledge and threat-intelligence checks
- **Network security:** Lead developer of MMT-DPI, Montimage's C deep packet inspection engine (~80% of commits since 2015), incl. its 2026 hardening overhaul
- **Phishing defense:** Built a gamified awareness-training platform (5 languages), an LLM-based email analysis service and the GEIGER cyber range (900+ users)
- **Digital twins:** Lead developer of COGNIMAN industrial pilot software and the secSIM cybersecurity twin platform; sole developer of the TaS IoT test platform
- **Community:** Organizing Committee, IEEE CloudCom 2026 and IFIP ICTSS 2026 (Paris); built both conferences' registration and payment platforms

EU R&D PROJECTS (H2020 · HORIZON EUROPE · DIGITAL EUROPE)

COGNIMAN · SECASSURED · AIAgent4Cyber · NERO · CyberSuite · INTACT · GEIGER · PUZZLE · ENACT

Percevio · Full-Stack Developer · Paris

Mar 2014 – Feb 2016

- WebRTC-based P2P content delivery network, video conferencing and live broadcasting

FPT Software / VTC Online · Software Developer · Hanoi

May 2011 – Apr 2012

- Developed Java and Android applications; led small development teams

OPEN SOURCE & PRODUCTS

48k+ GitHub stars · 1.1k followers · github.com/luongnv89

- **claude-howto:** Visual guide to Claude Code; 46k+ stars, 5k+ forks, #1 on GitHub Trending
- **IDD Stack:** Intention-Driven Development; skills that turn GitHub issues into tested PRs
- **asm:** Skill manager for AI coding agents across 21 platforms (npm); 960+ stars
- **Agent tooling:** pi-extensions, skills, context-stats and sleek-ui; each 100+ stars
- **Apps:** Ask Milo, TextWiz, CUStats (App Store); VS Code extensions, 2,000+ installs
